*Making a world of difference in cancer care*

## **ASCO Cost of Care Task Force**

### **Background**

In August 2007, ASCO established the Cost of Cancer Care Task Force to address the cost of cancer care. The work of the task force will be a multi-phase effort: The first priority will be for the group to discuss issues surrounding how physicians discuss costs of care with their patients and the advice ASCO could give its members regarding this issue. A subsequent effort will be to articulate policy and ASCO's role in addressing the fundamental question of how to control cost.
