

Patient Name:
Date of Service:

Chronic myelogenous leukemia (G9123 – G9127)

Circle **one** code from each area. Available, potentially relevant guidelines are listed below, by code.
Circle source of guideline consulted (ASCO and/or NCCN), or circle if no guideline available/patient on clinical trial (bottom of page).

Primary Focus of Visit	
G9050	Work-up, evaluation, or staging at the time of cancer diagnosis or recurrence
G9051	Treatment decision-making after disease is staged or restaged, Discussion of treatment options, supervising/coordinating active cancer directed therapy or managing consequences of cancer directed therapy
G9052	Surveillance for disease recurrence for patient who has completed definitive cancer-directed therapy and currently lacks evidence of recurrent disease; cancer directed therapy might be considered in the future
G9053	Expectant management of patient with evidence of cancer for whom no cancer directed therapy is being administered or arranged at present; cancer directed therapy might be considered in the future
G9054	Supervising, coordinating or managing care of patient with terminal cancer or for whom other medical illness prevents further cancer treatment; includes symptom management, end-of-life care planning, management of palliative therapies
G9055	Other, unspecified service not otherwise listed
Disease State	
G9123	Chronic myelogenous leukemia, limited to Philadelphia chromosome positive and/or BCR-ABL positive; chronic phase not in hematologic, cytogenetic, or molecular remission
G9124	Chronic myelogenous leukemia, limited to Philadelphia chromosome positive and /or BCR-ABL positive; accelerated phase not in hematologic cytogenetic, or molecular remission
G9125	Chronic myelogenous leukemia, limited to Philadelphia chromosome positive and /or BCR-ABL positive; blast phase not in hematologic, cytogenetic, or molecular remission
G9126	Chronic myelogenous leukemia, limited to Philadelphia chromosome positive and /or BCR-ABL positive; in hematologic, cytogenetic, or molecular remission
G9127	Chronic myelogenous leukemia, limited to Philadelphia chromosome positive and /or BCR-ABL positive; extent of disease unknown, under evaluation, not listed
Practice Guideline Use	
G9056	Management adheres to guidelines
G9057	Management differs from guidelines as a result of patient enrollment in an institutional review board approved clinical trial
G9058	Management differs from guidelines because the treating physician disagrees with guideline recommendations
G9059	Management differs from guidelines because the patient, after being offered treatment consistent with guidelines, has opted for alternative treatment or management, including no treatment
G9060	Management differs from guidelines for reason(s) associated with patient comorbid illness or performance status not factored into guidelines
G9061	Patient's condition not addressed by available guidelines
G9062	Management differs from guidelines for other reason(s) not listed
