* The figures here for J9217 reflect the ASP prices submitted by the drug manufacturer. However, we assumed that Medicare carriers are applying "least costly alternative" pricing and are using the J9202 price for J9217.

**Aloxi is the brand name for an antiemetic that is paid in 2004 at 95% of AWP using an unlisted code because the drug was approved by the FDA in the fall of 2003. Even though we do not have a code or volume for this drug from 2003 like we do for the other drugs shown in the table, we are showing it here because it is the highest growth injectable antiemetic drug currently on the market.
