Tata Memorial Centre welcomes you to the 4th Multidisciplinary Lung Cancer Management Course TMC - PGIMER - ISSLC - ASCO

Lung cancer is the most common cause of cancer related deaths in India and worldwide. It is estimated to cause one in five deaths due to cancer. Most patients with lung cancer present in an advanced stage and a significant number get referred late to an oncologist, probably due to a low index of suspicion among the primary treating physicians.

Enormous progress has been made in the management of lung cancer, especially in the metastatic setting. This multi-disciplinary cancer meeting aims to provide a comprehensive overview of the current evidence in the management of lung cancer. The discussion will be according to each stage of lung cancer with perspective from surgeons, medical and radiation oncologists, pulmonary physicians and palliative care experts. Latest advances such as stereotactic radiation, targeted therapy and immunotherapy will also be discussed. We look forward to welcoming you to this event.

Programme highlights

- Focus on multidisciplinary care
- Panel discussions
- Case Presentations
- Controversies
- Tumour boards

Target Audience

This meeting is designed for an audience of practitioners including pulmonary physicians, thoracic and oncologists, medical and radiation oncologists, palliative care specialists, radiologists, pathologists and all other healthcare professionals who manage patients with cancer.

Learning objectives

In addition, after attending the meeting the attendees will be better equipped to:

- Understand the epidemiology and risk factors for lung cancer
- Implement the latest diagnostic techniques and stage patients with lung cancer
- Know the evidence-based management strategies for each stage of lung cancer
- Apply multimodal therapeutic approaches in the management of locally advanced and oligometastatic disease
- Have a thorough understanding of systemic and targeted therapy for metastatic lung cancer along with the relevant mutation and biomarker studies
